

The freelance market in tech has been growing for several years. This trend continued in 2021.

Many tech talents take this path, especially more experienced profiles. As for companies, they see this as an opportunity to obtain specific, more rare skills for high value projects.

talent.io is designed for both permanent contract candidates and freelancers.

This section presents the daily rates of self-employed, according to their roles and their experience.

The analysis focuses on freelancers who carry out missions for companies based in Paris and Berlin (the cities for which we have sufficient data).

Average daily rate on talent.io: **€580**

Median rate on talent.io: **€600**

Median and average daily rates of tech freelancers in **Paris and Berlin**

	Median daily rate	Average daily rate
Paris	€600	€576
Berlin	€640	€615

Good to know:

On talent.io, the large majority of freelance profiles have considerable experience (at least 3 years of experience) because highly qualified profiles are often more suitable for freelance projects.

Therefore, the average daily rates do not take into account freelancers with less than 3 years experience.

Average daily rate by role, according to experience.

	3 - 6 years	7 + years
Full Stack developer	€495	€600
Backend developer	€480	€590
Frontend developer	€480	€580
Mobile developer	€460	€570
Data Scientist	€550	€640
Data Engineer	€570	€670
Product Manager	€530	€670
